

Marijn Bent

Technical founder & product builder

marijn@marijnbent.nl | +31 6 8105 3848
marijnbent.nl | github.com/marijnbent

Hands-on builder with experience co-founding a software company, leading a development team, creating integrations and building full-stack products. I enjoy connecting product decisions with reliable implementation and useful tools.

Selected experience

WordProof / Co-founder & technical lead

Led a team of four developers. Worked on the Laravel application, an AWS migration, a reusable WordPress SDK and integrations with Yoast, Shopify and Wix. Built across application, API and integration boundaries.

Studiozoek / Business owner & developer

Build and run business websites and internal tools. The Hub brings CRM, campaigns, review and operations together, with the application, websites and supporting tools organized in a shared repository.

Workshops & technical communication / Blockchain education

Experience delivering blockchain workshops and explaining technical concepts to different audiences.

Selected products

BookLite / TypeScript / React / Vite / Fastify / Drizzle

Self-hosted library with background imports, metadata from multiple providers, permissions, shared contracts and Kobo synchronization.

Prepped / Astro / React / SQLite

Recipe manager with imports, serving adjustments, household sharing, collections and English/Dutch interfaces.

Obsidian Print / TypeScript / Desktop & mobile

Public Obsidian plugin for printing notes, selections and folders, with platform-specific behavior and customization.

Technical focus

TypeScript, React, Astro, Vite, React Router, Laravel, WordPress integrations, APIs, relational databases, background jobs and deployment workflows.
